Aim of the project: “The project « Mediterranean: an history to be shared » proposes a radically new approach, that of a history written in equal parts between the northern, southern and eastern shores of the Mediterranean. Developed on a Mediterranean scale, the project takes account of recent developments in the discipline and is particularly relevant to the movements of world or connected history. « Mediterranean: an history to be shared » offers a set of resources, consisting of a book and a bilingual French-Arabic site. It is aimed at trainers, teachers and future teachers.”<sup>1</sup>
