

Before the General Assembly 2025, the EuroClio Board received and reviewed two applications for full membership from

- GO! education of the Flemish Community
- Klio Platform

The information they provided to the Board, about themselves, their membership, their mission, their aims, and their motivation to join, is provided below.

Name	GO! education of the Flemish Community
Name (original language)	GO! het Gemeenschapsonderwijs
Structure	Democratic
Members	27000
Country or registration	Belgium
Mission & Aims	<p>GO! organises official education in the Dutch speaking part of Belgium. It is financed by the Flemish government but functions independently of the Flemish Minister of Education. GO! is one of the three main educational networks in Flanders. GO! schools are spread all over Flanders and the Brussels capital region.</p> <p>GO! has day care centres, nurseries, primary and secondary schools amongst which many schools specialising in technical and professional education and several schools of creative and performing arts. GO! also has 12 large centres for adult education. For those 773 institutions in total GO! develops curricula and organises teacher training, which means that we are currently working for 27,000 members of staff serving 230,000 pupils and 120,000 adults. GO! is led by a Council whose representatives are chosen by all members of staff of our educational network and our parents. This Council's main mission is to guarantee that all pupils and adult learners, whatever their background or socio-economic status might be, can discover and develop their unique talents and study whatever they want in Flanders and the Brussels capital region.</p> <p>This freedom of choice of education and equal chances for everyone is all important to us. Equally important to us is helping learners grow into outspoken, outgoing, open-minded, empathic and critical citizens. In today's rather complex society with its many diverse beliefs, opinions, religions and ways of life it is more than ever crucial that we teach our children how to live together and show them that every person is worthwhile and nobody is superior. We firmly believe in this equal value principle and embrace diversity.</p> <p>Therefore our baseline is "Learning together how to live together". The Council is supported by administrative and pedagogical services (including an in service training department and GO!'s pedagogical advisory service which is coordinator of this project) that are located in Brussels. The</p>

Name	GO! education of the Flemish Community
	organising power however belongs to the 26 groups of schools who manage all GO! institutions of education in a given region.
Motivation	We want to broaden our european network to stimulate coopearation and enbale our schools access to the EuroClio network and content. We especially want to facilitate our history teachers access. to a Euroeapan wide demcoratic network. This is especially important in politically and democraticly challenging times.

Name	Klio Platform
Name (original language)	Platforma Klio
Structure	Democratic
Members	49
Country or registration	Croatia
Mission & Aims	<p>Since 2021, the Klio platform is an interdisciplinary and international project with the aim of improving the teaching of history and empowering history teachers. History as a school subject must first of all contribute to a better understanding of society and social relations based on research, interpretation and questioning of historical narratives. The goals of the Association are:</p> <ul style="list-style-type: none"> ● improving the teaching of history at all levels of formal and informal education, ● permanent and lifelong training and education, ● interdisciplinary linking of history teaching with related sciences that promote political, civic, human-legal and ● digital literacy, ● improvement of historical research, questioning of historical narratives and critical thinking about the past, ● promotion of historical science and teaching of history to the public, ● interdisciplinary and international connections of teachers, scientists and the interested public.
Motivation	As stated on our website, we support the ideas and efforts of the Euroclio Manifesto on high-quality history teaching, civic education and heritage education.
